Bulgaria

Located in the heart of the Balkans, Bulgaria offers a highly diverse landscape: the North is dominated by the vast lowlands of the Danube, while the South by the high plateaus. Neighbouring countries are: Romania to the North, Serbia and Macedonia to the West, Turkey and Greece to the South and in the East, the Black Sea Coast – a location that attracts numerous tourists all year round.

Capital: Sofia – located in the Western part of the country.

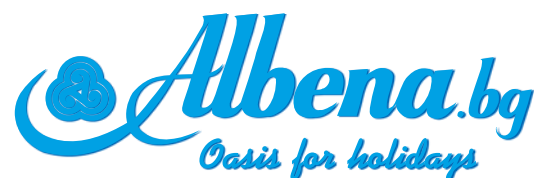

Geography and climate: Bulgaria features notable diversity with landscapes ranging from the Alpine snow-capped peaks in Rila, Pirin and the Balkan Mountains, to the mild and sunny Black Sea Coast; from the typically continental Danubian Plain (ancient Moesia) in the North, to the strong Mediterranean climatic influence in the valleys of Macedonia and in the lowlands in the southernmost parts

of Thrace.

History: A branch of the Slavs merged with the local Proto-Bulgarians in the late 7th century to form the first Bulgarian state in the Balkans. In the succeeding centuries, the Bulgarian and Byzantine Empires dominated South-East Europe, but by the end of 14th century the Ottoman Turks overran the region. Bulgaria regained its independence in 1878.

Nowadays, Bulgaria functions as a parliamentary democracy

within a unitary constitutional republic and it's a member of the European Union, NATO, the United Nations and the World Trade Organization.

Population: The National Statistical Institute of Bulgaria estimates the country's population in 2011 at 7,364,570 people. According to the same year census, it consists mainly of ethnic Bulgarians (84.8%), with two sizable minorities, Turks (8.8%) and Romani (4.9%). The remaining percentage includes smaller minorities, most prominently

Russians, Armenians, Arabs, Chinese, Jews, Vietnamese, Crimean Tatars and Sarakatsani (historically known also as Karakachans).

Language: The official language is Bulgarian and the used alphabet is the Cyrillic one, Bulgaria being the only EU nation to use it. Turkish and Macedonian are amongst the minority languages, but English, German, French and Russian are a lot spoken in the cities and major resorts.

The legend says that once upon a time, while God was sharing the land to the people, the Bulgarians were busy working for their living and could not come on time to get their part. When they finally arrived and asked God where was their land, the only thing God could do was to shake out what was left in his sack – and that was everything he was keeping to create the Garden of Eden. So, God gave the Bulgarians the best of everything: splendid mountains, the Black Sea coast, torrential rivers, over 600 mineral springs and fertile soils.

With a well-developed infrastructure, a wide variety of hotels and restaurants, SPA & Wellness centers, sport amenities, a unique panoramic beauty and a distinct touch in the offered services, Albena gains each year more and more friends. BEACH

Albena is famous for having one of the largest and most beautiful beaches in Europe. With a length of 3.5 kilometers and a width of 150 meters, crystal clear waters, fine golden sand and magnificent natural surroundings, Albena Resort rapidly became the favorite holiday destination for tourists all over the world.

Albena's beach is the perfect place to approach your physical, spiritual and mental well-being and to get in full contact with the nature in the same time! For those seeking active

days in the sun, a wide variety of water sports are available from sunrise till sundown.

For over 18 consecutive years, Albena Resort is the honored and proud holder of the International Blue Flag Award for ecologically clean beaches and its surroundings.

Important fact: Albena offers its guests 2 sun chairs and one umbrella free of charge on the beach.

NATURE

Albena Resort is one of the most rare places in Europe that manages to keep the nature intact. Having as integral part one of the most beautiful natural reserves in Bulgaria, Albena offers its guests the perfect combination between the unique and untouched nature and the benefits of a modern tourist resort.

"Baltata Natural Reserve" is covering an area of approximately 183.2 ha on which there are found more than 260 types of plants, 183 species of birds and 337 kinds of animals, most of it protected by law and included in Bulgaria's Red Book.

An important proof of the strong commitment in preserving the natural environment is the fact that Albena is the only resort in Bulgaria that has its own climate observation station, equipped for studying the air temperature, humidity, wind direction and speed, seawater temperature, as well as other eco parameters of the environment.

Albena has a gentle climate, with mild winters and temperate summers. The average temperature in the air during the summer is between 23 and 28°C and the water temperature is around 25°C.

RESTAURANTS

Let your eyes be captivated by the deep blue of the sea while enjoying a wonderful gastronomic experience complemented by a wide wine list with prestigious labels!

We invite you to arouse your senses with delicious and refined dishes in one of the many restaurants within our resort. From traditional to international cuisine, Albena Resort has it all: Mexican delights – "Restaurant Tex Mex", Italian specialties – "Restaurant Ti Amo", French cuisine – "Restaurant Ciel Bleu", Mediterranean delicacies – "Restaurant Kaliopa", Fusion cuisine – "Green Apple", juicy stakes – "Steak House Poco Loco" and many others. Let us show you that any meal can be turned into a real feast!

Because we always put first the well-being of our guests, we have started growing our own ecologically clean fruits and vegetables. And that's not all: in order to make sure that the quality of our products is the best, in 2011 we have created within the resort a Food Quality Control laboratory.

BEACH LIBRARIES

In 2013, Albena opened the first free beach library in the European Union and the third worldwide. In 2014, 2 new ones were added on different locations of the beach, as

well as 10 new indoor libraries with special reading areas in several of the hotels. All libraries are completely free and no card or guarantee are required. The guests are free to take the books home, but also to bring others in return in order to diversify our collection. Currently, the bookshelves are filled with more than 6000 books in over 15 languages.

KIDS

Albena is famous for being a family friendly resort and that's mainly because we love our guests, but we simply adore the little ones!

Because their happiness is extremely important to us, we have created the perfect conditions and fun activities for them to spend a wonderful time in our resort: kids clubs, playgrounds, swimming pools, mini aqua parks, game hall, amusement park, great entertainment programs, animation teams and many other surprises. Our professional teachers and baby sitters will take great care of the children while the grownups enjoy a relaxing SPA session, a tennis match or a romantic picnic on the beach.

Aquamania

Fun, Games and Excitement for the whole family!

Aquamania waterpark spreads out on a territory of nearly 30,000 square meters within the resort of Albena Resort in Bulgaria, an area span of around 5 football pitches, with one-of-a-kind water attractions for adults and kids.

Visitors are able to try the 4-lane 314-metre long ProRACER, the most popular headfirst mat racing ride in the world. The 20 meter high lifting tower will lead the riders to another adrenaline slide: the 183 meter long megatube rafting slide called the MAMMOTH, with thrills the family can enjoy together.

Children enjoy a paradise of colorful playgrounds, water attractions of pint-sized versions of iconic thrill rides as the KIDZ Tornado, KIDZ Racer, KIDZ Twister, KIDZ Mini River, fascinating water effects and figures as the Turtle Space Deck /the Turtle Fountain/ and the Balboa Lagoon /Playground/ and many more. The kids will also discover a mysterious transport device, a stargate, that can "teleportate" them into a world of joy and imagination.

Rivers of water sway around the shady trees (Lazy river), streams dash in rocky canyons (Wild River), fascinating fountains explode in color and forms while the interior is carved in millennium rocks. Jets of water can be shot at targets, drop water bombs and special effects are triggered all around the park.

A second phase of construction, planned for 2015 will include another two water attractions: the 191 meters long TORNADO - and the 76 meters long Free Fall.
